

On the cover:

Kiko is hard at work providing patient care. It might look like she is lying down on the job, but facility dogs are specifically trained and work with their Child Life handler to provide intervention as part of coping plans during procedures. During Liam's procedure, Kiko snuggled right in – even laying on his hand like a pillow. The CHAMPs program is entirely supported through philanthropy.

Dear BSTP,
How do I begin to thank each and every one of you for everything you have done for our patients and their families?! This group is absolutely amazing and so generous year after year. This year you have out done yourselves with a total of \$129,355.00. Your kindness is greatly appreciated by everyone here at American Family children's Hospital. I look forward to our continued partnership and to see what we are able to do in the future. Thank you so very much for everything! Lori
